

## ENTRY CRITERIA

### CRITERIA

---

To enter the UAE Drones for Good Award entries must comply with the following criteria:

- To attend and demonstrate a working prototype at the final stage of the competition
- Entries must reflect a genuine service or present a solution to a real human need
- Entries must suggest new ways of improving an existing service through the use of drones, or suggest new kinds of services that could be practically and economically implemented through drone technologies
- Be semi or fully autonomous
- Be innovative and use the most advanced civilian technology available
- Be safe, effective and economical

### ELIGIBILITY

---

Entries must qualify under the following criteria to enter the UAE Drones for Good Award:

- The national competition is open to all UAE citizens and residents, defined as anyone living, working or studying in the UAE during the period of the competition
- UAE citizens and residents, individuals, teams, universities or companies may choose to participate in either the national competition or the international competition
- All non-UAE citizens and residents are eligible to participate in the international competition. The international competition is open to everyone.
